

How to Determine Your Ring Size

Printing Instructions

1. To obtain accurate measurements, please download this PDF to your computer and print this document at a page size of 100 percent.
2. Verify the page scale setting prior to printing by checking your printer dialog box. Under the page scaling option, select "none" or uncheck the box for page scaling.
3. Compare a ruler or U.S. Quarter with the guides on the right to ensure your printed document is the correct size. The marks of the ruler should match precisely and the U.S. Quarter should completely fill the circle shape.

Measure current ring:

Use the ring that fits comfortable and has a similar width band to the one you would like to purchase.

1. Place one of your own rings over the circles shown to see correct size.
2. The correct circle should fill the inside of the ring.
3. Note that the pattern is in US size so please refer to the size chart above to find your size for the desired country.
